This is a template README.adoc file for the individual Connect repos. Use this as a guide and delete this line when you fork this README! Remember, any actual documentation should go in this repo in the /includes folder. Keep the README in your repo short - just a description and installation instructions.

Description

Write a description on what your repository does and how to use it

Installation Instructions

How to install

Build Status

TravisCI link or something else - delete if not needed

Documentation

There is no further specific documentation for this.

The main documentation for Connect can be found at: docs.connect.cd
